SL-UP 380XC

Synthetic GCO Oven Oil with Cleaner

SLFI's UP380XC, High Temperature Chain Lubricant, is made with the finest base fluids. These base fluids are specifically chosen for their thermal and oxidative resistance. They are further enhanced with proprietary industrial additives that greatly extend their life over normal synthetic fluids.

ATTRIBUTES

- Carbon and varnish control
- Resists water washout
- Oxidation stability and long life at very high temperatures
- High flash & auto-ignition points for added safety
- Very good coolant properties
- Long life fluid allows for extended oil drains

TYPICAL LUBRICANT PROPERTIES

SL-UP 380XC Viscosities	100	220
Viscosity Index	102	107
Viscosity cSt @ 40°C	110	215
Viscosity cSt @ 100°C	12.3	20
Flash Point OF	503	505
Pour Point°F	-38	-35
Four Ball, 40 Kg, 1200 RPM, 75OC 1Hr, SCAR DIA mm	.40	.40
Copper Corrosion	1a	1a
