SLF-Camel-FG

Synthetic Food Grade Camel Clear Silica Gel Grease

SLF-Camel-FG is specially formulated semi-fluid grease for high-temperature wheel bearing applications. It is made with silica gel and thickeners, and specific synthetic base stocks and additives that provide exceptional service in severe applications. SLF-Camel-FG meets H1 requirements for lubricants with incidental food contact and complies with FDA 21 CFR 178.3570.

ATTRIBUTES

- Oxidative and thermal stability
- Resistance against water contamination
- Outstanding materials compatibility
- High film strength
- Rust and corrosion control
- High flash point
- Reduced maintenance costs and downtime

TYPICAL LUBRICANT PROPERTIES

SLF-Camel-FG Grades	3045
Penetration: 60 strokes	400
Penetration: 10,000 strokes	425
Dropping point (°F)	None
Rust Test (D665)	Pass
Water washout, % loss @ 100°F	<1
Four ball EP (weld), Kg	325
Four ball wear, Scar mm	0.45
